- 1. Average annual returns assume reinvestment of all dividends (ordinary income and capital gains) and reflect the deduction of all Fund operating expenses, not including Plan administrative fees. If Plan administrative fees were reflected, returns would be less favorable.
- 2. Volatility/risk level is intended to provide an idea of how volatile ("risky") the investment options in the Plan may be relative to one another. The risk level assigned to each category of investment with the Plan is based on long-term trends in the volatility of returns for the categories. Though each individual fund may be more or less volatile than the average of its group, the Risk level should serve as a prudent guide to the level of long-term market risk involved with each fund. Foreign investments involve special risks, including currency fluctuations, taxation differences and political developments. Equity securities of small and mid-sized companies may be more volatile than securities than securities of larger, more established companies. Asset allocation and balanced investment options and models are subject to the risks of the underlying funds, which can be a mix of stocks/stock funds and bond/bond funds. A bond fund's yield, share price and total return change daily and are based on changes in interest rates, market conditions, economic and political news, and the quality and maturity of its investments. In general, bond prices fall when interest rates rise and vice versa. Stable Value funds are not federally guaranteed and may lose value.
- 3. The gross fund expenses are deducted by the investment company prior to the calculation of the net asset value (NAV). The Gross Expense Ratios shown do not reflect any temporary fee or expense waivers that may be in effect for a fund. The performance of a fund with a temporary fee or expense waiver would have been higher if these waivers had been reflected.
- 4. The administrative fee is deducted and prorated among investment options in your account at a rate of 0.0083333% per month or 0.10% annually. This fee is deducted the last business day of each month. The fee is only charged on the first \$125,000 in an individual's account. The administrative fee does not apply to contributions made to the SIF investment options prior to July 1, 1992.

. Trading restrictions. Some rands impose trade restrictions to prevent short-term trading.

5. Trading restrictions. Some funds impose trade restrictions to prevent short-term trading.

6. Benchmarks. The performance of predetermined set of securities, used for comparison purposes. The benchmarks presented are based on published indexes. An index is not professionally managed, does not have a defined investment objective, and does not incur fees or expenses. Therefore, performance of an index fund will generally be less than its benchmark index. You cannot invest directly in an index.
